Our mission

- EERA lobbies for higher collection, recycling and recovery rates of WEEE
- EERA stands for high quality treatment of WEEE
- EERA promotes fair competition
- EERA advances sound economic conditions for recycling companies

Our Work

EERA speaks actively and publicly in the interest of WEEE recycling companies:

- EERA is the WEEE recyclers unified voice in CENELEC and WEEELABEX organisations.
- EERA actively lobbies for WEEE recyclers interests at an EU and national level.
- EERA is recognised as an important stakeholder by EU bodies and is regularly consulted by DG Environment.
- EERA actively contributes to national agencies such as:
 - > National Environmental Agencies in several EU countries
 - > Monitoring Councils
 - > Chambers of Commerce
 - > Various National Committees of Standardisation Organisations (CENELEC and others)
- EERA co-operates with other stakeholders to achieve political and practical goals.
- EERA shares practical experience and industrial know-how with decision makers.
- EERA participates in numerous stakeholder consultations.
- EERA actively participates in Horizon 2020 projects and North Sea Resources Roundabout New Green Deal "Fast Track Notifications".
- EERA delivers position papers on urgent topics for our business such as:
 - > The risks of high energy batteries
 - > The review of the waste shipment regulation
 - > Plastics EU recast on POP regulation
 - > EERA follows many more developments and acts in recyclers interest when needed

Why WEEE recyclers should be members of EERA

EERA can help you with your *hands-on* WEEE recycling business. If you are in WEEE recycling, you would benefit from becoming an active member of EERA.

- Technical Working Groups act on topics of concern like:
 - > Plastics recycling
 - > POP, REACH and RoHS regulation and directives
 - > Batteries in WEEE
 - > Mandatory standards
 - > Economic effects caused by e.g. ever increasing legislation and complexity of materials
- EERA conducts research and publishes results on effects for our recycling industry like:
 - > Unfair competition
 - > Scavenging
 - > Illegal export
 - > Ineffective enforcement
- EERA publishes practical guidelines on topics such as:
 - > ADR-rules
 - > Problems with CRT Glass
 - > Plastics recycling

... and much more to come

How can you benefit from EERA?

- EERA members enjoy either full or associate membership at an European level - your views and concerns are heard and directly addressed with relevant stakeholders.
- The EERA secretariat and the team of senior experts understand your needs.
- EERA experts are experienced recyclers and have been in the WEEE recycling industry for many years.
- All members are companies that see WEEE recycling as their core business.
- Participate in working groups dealing with issues that matter to you.
- Meet the leading WEEE recycling companies and use the chance for networking and business opportunities.
- Enjoy opportunities to visit recycling operations in different European locations.
- Receive and contribute to relevant publications.
