English Version

**Collection, logistics & treatment requirements for WEEE - Part 6:
Report on the alignment between Directive 2012/19/EU and EN
50625 series standards and EN 50614**

To be completed

To be completed

This draft Technical Report is submitted to CENELEC members for vote by correspondence.
Deadline for CENELEC: 2018-03-16.

It has been drawn up by CLC/TC 111X.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Recipients of this draft are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

Warning : This document is not a Technical Report. It is distributed for review and comments. It is subject to change without notice and shall not be referred to a Technical Report.

17 **European foreword**

18 This document (CLC/FprTR 50625-6:2017) has been prepared by CLC/TC 111X "Environment".

19 This document is currently submitted to voting in accordance with the Internal Regulations, Part 2,
20 Subclause 11.4.3.3 (simple majority) for acceptance as a CENELEC Technical Report.

21 This document has been prepared under mandate M/518 given to CENELEC by the European
22 Commission and the European Free Trade Association.

23 **1 Scope**

24 This Technical Report provides information on the alignment between Directive 2012/19/EU and EN
25 50625 series standards and EN 50614.

26 **2 Normative references**

27 The following documents are referred to in the text in such a way that some or all of their content
28 constitutes requirements of this document. For dated references, only the edition cited applies. For
29 undated references, the latest edition of the referenced document (including any amendments) applies.

30 There are no normative references in this document.

31 **3 Introduction**

32 Commission mandate M/518 requires the production of a number of deliverables to support Directive,
33 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE). This Directive had to be transposed
34 into national law in all Member States by February 2014 and so the standards required to support this
35 legislation had to be developed according to a strict timescale.

36 Regarding the collection, logistics and treatment of WEEE, Directive 2012/19/EU contains some
37 requirements to be fulfilled by operators, most of these are not very specific. Mandate M/518 requires that
38 the deliverables prepared to support Directive 2012/19/EU be 'state of the art'. Consequently, the
39 standards and technical specifications prepared under M/518 may contain more detail than the directive.

40 Mandate M/518 has the following provisions:

41 'Article 8(5) of the WEEE Directive requires the Commission to request that the European standardisation
42 organisations develop European standards for the treatment, including recovery, recycling and preparing
43 for re-use, of WEEE, reflecting the state of the art. Unlike harmonised standards, the references of which
44 are published in the Official Journal of European Union, and which are prepared to support Union
45 harmonisation legislation, these standards do not automatically provide a "presumption of conformity".
46 However, the Commission may in the future adopt implementing acts laying down minimum quality
47 standards based in particular on the European standards developed by the European standardisation
48 organisations.

49 The European standard(s) requested by this mandate shall assist relevant operators in fulfilling the
50 requirements of the WEEE Directive. The European standard(s) may also give additional guidance to
51 operators beyond the level of protection requested strictly by the WEEE Directive. Such additional
52 guidance should be clearly distinguished from the rest of the text, e.g. figuring as a separate annex or in a
53 separate deliverable. The standard(s) shall distinguish between requirements which are of an informative
54 nature, and requirements which should be used by operators in the recycling chain in order to be able to
55 verify compliance with the requirements in the standard(s)'.
56

57 Based upon the above, CLC/TC 111X decided at the outset to not include annexes within each standard,
58 but instead to create a Technical Report. The European Commission has confirmed that a separate
59 Technical Report is an acceptable solution to meet the Mandate M/518.

59 NOTE An Annex ZZ is used in harmonised standards to link the provisions of the harmonised standard to the
60 Essential Requirements of the New Approach Directive it supports. As per the text shown above from mandate
61 M/518, this is not applicable to standards supporting the WEEE Directive.

62 **4 EN and TS documents addressed**

- EN 50625-1 :2014 Part 1: General treatment requirements

- EN 50625-2-1 :2015 Part 2-1: Treatment requirements for lamps
- EN 50625-2-2 :2015 Part 2-2: Treatment requirements for WEEE containing CRTs and flat panel displays
- EN 50625-2-3 :2017 Part 2-3: Treatment requirements for temperature exchange equipment and other WEEE containing VFC and/or VHC.
- EN 50625-2-4 :2017 Part 2-4: Treatment requirements for photovoltaic panels
- CLC/TS 50625-3-1 :2015 Part 3-1: Specification for de-pollution – General
- CLC/TS 50625-3-2 :2016 Part 3-2: Technical specification for de-pollution - Lamps
- CLC/TS 50625-3-3 :2017 Part 3-3: Specification for de-pollution – WEEE containing CRTs and flat panel displays
- CLC/TS 50625-3-4 :2017 Part 3-4: Specification for de-pollution – temperature exchange equipment and other WEEE containing VFC and/or VHC.
- CLC/TS 50625-3-5 :2017 Part 3-5: Technical specification for de-pollution – photovoltaic panels
- CLC/TS 50625-4 :2017 Specification for the collection and logistics associated with WEEE
- EN 50614 :2018 Requirements for the preparation for re-use of waste electrical and electronic equipment

63 NOTE 1 CLC/TS 50625-5 Collection, logistics & Treatment requirements for WEEE – Part 5: Specification for the
64 final treatment of WEEE fractions - Copper and precious metals' is not covered by the mandate M/518.

65 NOTE 2 EN 50614 is expected to be published in 2018.

66 5 Guidance

67 5.1 Distinction between normative requirements and informative elements in 68 standardization deliverables

69 The standard(s) are based on normative treatment requirements derived from the legal text of Directive
70 2012/19/EC, especially Annex VII. Some normative requirements are based on other existing EU
71 legislation and regulations.

72 The text is using normative text and when appropriate additional notes that are informative.

73 The standardisation deliverables have normative annexes and informative annexes.

74 The European Standards (EN) and Technical Specifications (TS) establish:

75 — A normative element; this element describes the scope of the document and/or sets out provisions
76 (including requirements).

77 — An informative element; this element is intended to assist the understanding or use of the document
78 or provides contextual information about its content, background or relationship with other
79 documents. Notes do not contain instructions, recommendation, permissions, or any information
80 considered indispensable for the use of the document. Informative annexes may contain optional
81 requirements.

82 Normative elements are not used in the following sections and/or elements of the documents:
83 Introduction; notes; examples; informative annex. The scope is a normative element, but is not a
84 requirement because it does not give an expression in the content of a document conveying objectively

85 verifiable criteria to be fulfilled and from which no deviation is permitted if compliance with the document
86 is to be claimed.

87 The standardisation deliverables mentioned in Clause 4, covered by M/518, can be the base for audits
88 that are required by some Member States and/or by Collection Schemes. In order to comply with these
89 standards an operator is expected to comply with what is stated in the normative text.

90 A standardisation deliverable does not in itself impose any obligation upon anyone to follow it. However,
91 an obligation can be imposed, for example, by legislation or by a contract which makes reference to the
92 document.

93 In order to be certified according to these standards a company is expected to comply with what is stated
94 in the normative text.

95 A more detailed description of informative and normative elements in the standardisation deliverables is
96 given in CEN/CENELEC Internal Regulations Part 3:2017.

97 NOTE The Internal Regulations Part 3 from CEN/CENELEC provide information on normative and informative
98 elements in Clause 3, 'Terms and definitions'. This clause also defines European Standards (EN) and Technical
99 Specifications (TS) and Technical Report (TR) documents. The objective of standardization is explained more in
100 Clause 4.

101 The standards do have normative annexes and informative annexes.

102 **5.2 Description on how the standardisation deliverables relate to different provisions of** 103 **the WEEE directive**

104 Appendix A gives a more detailed overview on how the standardisation deliverables relate to the different
105 provisions of the WEEE Directive.

Annex A (informative)

Description on how the standardisation deliverables relate to different provisions of the WEEE directive

WEEE Directive	Title	Content of article	European Standardisation deliverables developed under M/518
Article 1	Subject matter	This Directive lays down measures to protect the environment and human health by preventing or reducing the adverse impacts of the generation and management of waste from electrical and electronic equipment (WEEE) and by reducing overall impacts of resource use and improving the efficiency of such use in accordance with Articles 1 and 4 of Directive 2008/98/EC, thereby contributing to sustainable development.	EN 50625-1 EN 50625-2-1 EN 50625-2-2 EN 50625-2-3 EN 50625-2-4 CLC/TS 50625-3-1 CLC/TS 50625-3-2 CLC/TS 50625-3-3 CLC/TS 50625-3-4 CLC/TS 50625-3-5 CLC/TS 50625-4 EN 50614
Article 2	Scope	<p>2.1. This Directive shall apply to electrical and electronic equipment (EEE) as follows:</p> <p>(a) from 13 August 2012 to 14 August 2018 (transitional period), subject to paragraph 3, to EEE falling within the categories set out in Annex I. Annex II contains an indicative list of EEE which falls within the categories set out in Annex I;</p> <p>(b) from 15 August 2018, subject to paragraphs 3 and 4, to all EEE. All EEE shall be classified within the categories set out in Annex III. Annex IV contains a non-exhaustive list of EEE which falls within the categories set out in Annex III (open scope).</p> <p>2.2. This Directive shall apply without prejudice to the requirements of Union legislation on safety and health, on chemicals, in particular Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), establishing a European Chemicals Agency (3), as well as of specific Union waste management or product design legislation.</p> <p>2.3. This Directive shall not apply to any of the</p>	EN 50625-1 EN 50625-2-1 EN 50625-2-2 EN 50625-2-3 EN 50625-2-4 CLC/TS 50625-3-1 CLC/TS 50625-3-2 CLC/TS 50625-3-3 CLC/TS 50625-3-4 CLC/TS 50625-3-5 CLC/TS 50625-4 EN 50614

WEEE Directive	Title	Content of article	European Standardisation deliverables developed under M/518
		<p>following EEE:</p> <p>(a) equipment which is necessary for the protection of the essential interests of the security of Member States, including arms, munitions and war material intended for specifically military purposes;</p> <p>(b) equipment which is specifically designed and installed as part of another type of equipment that is excluded from or does not fall within the scope of this Directive, which can fulfil its function only if it is part of that equipment; (c) filament bulbs.</p> <p>2.4. In addition to the equipment specified in paragraph 3, from 15 August 2018, this Directive shall not apply to the following EEE:</p> <p>(a) equipment designed to be sent into space;</p> <p>(b) large-scale stationary industrial tools;</p> <p>(c) large-scale fixed installations, except any equipment which is not specifically designed and installed as part of those installations;</p> <p>(d) means of transport for persons or goods, excluding electric two-wheel vehicles which are not type-approved;</p> <p>(e) non-road mobile machinery made available exclusively for professional use;</p> <p>(f) equipment specifically designed solely for the purposes of research and development that is only made available on a business-to-business basis;</p> <p>(g) medical devices and in vitro diagnostic medical devices, where such devices are expected to be infective prior to end of life, and active implantable medical devices.</p> <p>2.5. No later than 14 August 2015, the Commission shall review the scope of this Directive set out in point (b) of paragraph 1, including the parameters to distinguish between large and small equipment in Annex III, and shall present a report thereon to the European Parliament and to the Council. The report shall be accompanied by a legislative proposal, if appropriate.</p>	
Article 3	Definitions	[...]	EN 50625-1 EN 50625-2-1 EN 50625-2-2 EN 50625-2-3 EN 50625-2-4 CLC/TS 50625-3-1

WEEE Directive	Title	Content of article	European Standardisation deliverables developed under M/518
			CLC/TS 50625-3-2 CLC/TS 50625-3-3 CLC/TS 50625-3-4 CLC/TS 50625-3-5 CLC/TS 50625-4 EN 50614
Article 4	Product design	Member States shall, without prejudice to the requirements of Union legislation on the proper functioning of the internal market and on product design, including Directive 2009/125/EC, encourage cooperation between producers and recyclers and measures to promote the design and production of EEE, notably in view of facilitating re-use, dismantling and recovery of WEEE, its components and materials. In this context, Member States shall take appropriate measures so that the ecodesign requirements facilitating re-use and treatment of WEEE established in the framework of Directive 2009/125/EC are applied and producers do not prevent, through specific design features or manufacturing processes, WEEE from being re-used, unless such specific design features or manufacturing processes present overriding advantages, for example, with regard to the protection of the environment and/or safety requirements.	void
Article 5	Separate collection	<p>5.1. Member States shall adopt appropriate measures to minimise the disposal of WEEE in the form of unsorted municipal waste, to ensure the correct treatment of all collected WEEE and to achieve a high level of separate collection of WEEE, notably, and as a matter of priority, for temperature exchange equipment containing ozone-depleting substances and fluorinated greenhouse gases, fluorescent lamps containing mercury, photovoltaic panels and small equipment as referred to in categories 5 and 6 of Annex III.</p> <p>5.3. Member States may designate the operators that are allowed to collect WEEE from private households as referred to in paragraph 2.</p> <p>5.4. Member States may require that the WEEE deposited at collection facilities referred to in paragraphs 2 and 3 is handed over to producers or third parties acting on their behalf or is handed over, for purposes of preparing for re-use, to designated establishments or undertakings.</p> <p>5.5. In the case of WEEE other than WEEE from</p>	CLC/TS 50625-4 EN 50614

WEEE Directive	Title	Content of article	European Standardisation deliverables developed under M/518
		private households, and without prejudice to Article 13, Member States shall ensure that producers or third parties acting on their behalf provide for the collection of such waste.	
Article 6	Disposal and transport of collected WEEE	<p>6.1. Member States shall prohibit the disposal of separately collected WEEE which has not yet undergone the treatment specified in Article 8.</p> <p>6.2. Member States shall ensure that the collection and transport of separately collected WEEE is carried out in a way which allows optimal conditions for preparing for re-use, recycling and the confinement of hazardous substances.</p> <p>In order to maximise preparing for re-use, Member States shall promote that, prior to any further transfer, collection schemes or facilities provide, where appropriate, for the separation at the collection points of WEEE that is to be prepared for re-use from other separately collected WEEE, in particular by granting access for personnel from re-use centres.</p>	EN 50625-1 EN 50625-2-1 EN 50625-2-2 EN 50625-2-3 EN 50625-2-4 CLC/TS 50625-3-1 CLC/TS 50625-3-2 CLC/TS 50625-3-3 CLC/TS 50625-3-4 CLC/TS 50625-3-5 CLC/TS 50625-4 EN 50614
Article 7	Collection rate	[...]	
Article 8	Proper treatment	<p>8.1. Member States shall ensure that all separately collected WEEE undergoes proper treatment.</p> <p>8.2. Proper treatment, other than preparing for re-use, and recovery or recycling operations shall, as a minimum, include the removal of all fluids and a selective treatment in accordance with Annex VII.</p> <p>8.3. Member States shall ensure that producers or third parties acting on their behalf set up systems to provide for the recovery of WEEE using best available techniques. The systems may be set up by producers individually or collectively. Member States shall ensure that any establishment or undertaking carrying out collection or treatment operations stores and treats WEEE in compliance with the technical requirements set out in Annex VIII.</p> <p>8.5. For the purposes of environmental protection, Member States may set up minimum quality standards for the treatment of the WEEE that has been collected. Member States which opt for such quality standards shall inform the Commission thereof, which shall publish these standards.</p> <p>The Commission shall, not later than 14 February 2013, request the European standardisation</p>	EN 50625-1 EN 50625-2-1 EN 50625-2-2 EN 50625-2-3 EN 50625-2-4 CLC/TS 50625-3-1 CLC/TS 50625-3-2 CLC/TS 50625-3-3 CLC/TS 50625-3-4 CLC/TS 50625-3-5 EN 50614

WEEE Directive	Title	Content of article	European Standardisation deliverables developed under M/518
		<p>organisations to develop European standards for the treatment, including recovery, recycling and preparing for re-use, of WEEE. Those standards shall reflect the state of the art.</p> <p>In order to ensure uniform conditions for the implementation of this Article, the Commission may adopt implementing acts laying down minimum quality standards based in particular on the standards developed by the European standardisation organisations. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 21(2).</p> <p>A reference to the standards adopted by the Commission shall be published.</p> <p>8.6. Member States shall encourage establishments or undertakings which carry out treatment operations to introduce certified environmental management systems in accordance with Regulation (EC) No 1221/2009 of the European Parliament and of the Council of 25 November 2009 on the voluntary participation by organisations in a Community eco-management and audit scheme (EMAS).</p>	
Article 9	Permits	<p>9.1. Member States shall ensure that any establishment or undertaking carrying out treatment operations obtains a permit from the competent authorities in compliance with Article 23 of Directive 2008/98/EC.</p> <p>9.3. Member States shall ensure that the permit or the registration referred to in paragraphs 1 and 2 includes all the conditions that are necessary for compliance with the requirements of Article 8(2), (3) and (5) and for the achievement of the recovery targets set out in Article 11.</p>	EN 50625-1 EN 50625-2-1 EN 50625-2-2 EN 50625-2-3 EN 50625-2-4 CLC/TS 50625-3-1 CLC/TS 50625-3-2 CLC/TS 50625-3-3 CLC/TS 50625-3-4 CLC/TS 50625-3-5 CLC/TS 50625-4 EN 50614
Article 10	Shipments of WEEE	<p>10.1. The treatment operation may also be undertaken outside the respective Member State or the Union provided that the shipment of WEEE is in compliance with Regulation (EC) No 1013/2006 and Commission Regulation (EC) No 1418/2007 of 29 November 2007 concerning the export for recovery of certain waste listed in Annex III or IIIA to Regulation (EC) No 1013/2006 of the European Parliament and of the Council to certain</p>	EN 50625-1 EN 50625-2-1 EN 50625-2-2 EN 50625-2-3 EN 50625-2-4 CLC/TS 50625-3-1 CLC/TS 50625-3-2

WEEE Directive	Title	Content of article	European Standardisation deliverables developed under M/518
		<p>countries to which the OECD Decision on the control of transboundary movements of wastes does not apply.</p> <p>10.2. WEEE exported out of the Union shall only count towards the fulfilment of obligations and targets set out in Article 11 of this Directive if, in compliance with Regulations (EC) No 1013/2006 and (EC) No 1418/2007, the exporter can prove that the treatment took place in conditions that are equivalent to the requirements of this Directive.</p> <p>10.3. The Commission shall, not later than 14 February 2014, adopt delegated acts, in accordance with Article 20, laying down detailed rules supplementing those in paragraph 2 of this Article, in particular the criteria for the assessment of equivalent conditions.</p>	<p>CLC/TS 50625-3-3 CLC/TS 50625-3-4 CLC/TS 50625-3-5 CLC/TS 50625-4 EN 50614</p>
Article 11	Recovery targets	<p>11.1. Regarding all WEEE separately collected in accordance with Article 5 and sent for treatment in accordance with Articles 8, 9 and 10, Member States shall ensure that producers meet the minimum targets set out in Annex V.</p> <p>11.2. The achievement of the targets shall be calculated, for each category, by dividing the weight of the WEEE that enters the recovery or recycling/preparing for re-use facility, after proper treatment in accordance with Article 8(2) with regard to recovery or recycling, by the weight of all separately collected WEEE for each category, expressed as a percentage.</p> <p>Preliminary activities including sorting and storage prior to recovery shall not count towards the achievement of these targets.</p> <p>11.3. In order to ensure uniform conditions for the implementation of this Article, the Commission may adopt implementing acts establishing additional rules on the calculation methods for the application of the minimum targets. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 21(2).</p> <p>11.4. Member States shall ensure that, for the purpose of calculating these targets, producers or third parties acting on their behalf keep records on the weight of WEEE, its components, materials or substances when leaving (output) the collection facility, entering (input) and leaving (output) the treatment facilities and when entering (input) the recovery or recycling/ preparing for re-use facility.</p> <p>Member States shall also ensure that, for the</p>	<p>EN 50625-1 EN 50625-2-1 EN 50625-2-2 EN 50625-2-3 EN 50625-2-4 CLC/TS 50625-3-1 CLC/TS 50625-3-2 CLC/TS 50625-3-3 CLC/TS 50625-3-4 CLC/TS 50625-3-5 CLC/TS 50625-4 EN 50614</p>

WEEE Directive	Title	Content of article	European Standardisation deliverables developed under M/518
		<p>purposes of paragraph 6, records on the weight of products and materials when leaving (output) the recovery or recycling/preparing for re-use facility are kept.</p> <p>11.5. Member States shall encourage the development of new recovery, recycling and treatment technologies.</p> <p>11.6. On the basis of a report of the Commission accompanied, if appropriate, by a legislative proposal, the European Parliament and the Council shall, by 14 August 2016, re-examine the recovery targets referred to in Annex V, Part 3, examine the possibility of setting separate targets for WEEE to be prepared for re-use and re-examine the calculation method referred to in paragraph 2 with a view to analysing the feasibility of setting targets on the basis of products and materials resulting (output) from the recovery, recycling and preparation for re-use processes.</p>
